

Description:

Founded in 1988, OptiTex specializes in the development of innovative, easy-to-use, 2D and 3D CAD/CAM software for the textile industries. Our native Windows-based software for digitizing, pattern engineering, grading, marking, advanced automatic nesting and draping, is specifically designed to meet the needs of today's manufacturers of industrial fabrics, apparel, upholstery, transportation, composites, home furnishings, among others.

OptiTex's products are designed to simplify processes, minimize production costs and most importantly, shorten the garment production cycle.

OptiTex's open architecture system comes amply equipped with a multitude of import/export formats, enabling OptiTex users to interface with a wide range of software and hardware.

Available in 20 languages, OptiTex products are sold and supported around the world through a network of certified distributors and OEMs.
